Obsolete Transactions in S4HANA

- The following transactions for entering and displaying goods movements (material documents) - called "MB transactions" - have been replaced by the single-screen generalized transaction 'MIGO'. The Obsolete T codes in S4HANA are MB01, MB02, MB03, MB04, MB05, MB0A, MB11, MB1A, MB1B, MB1C, MB31, MBNL, MBRL, MBSF, MBSL, MBST and MBSU
- The specific transactions like XD01, XD02, XD03 or VD01, VD02, VD03/XK01, XK02, XK03 or MK01, MK02, MK03 etc. are Obsolete in S4HANA. These all T Codes replaced with single T code as 'BP'. **Vendors and Customers are modeled as – Business Partners (BP).**
- With S/4HANA this data model has been changed significantly. The new de-normalized table MATDOC has been introduced which contains the former header and item data of a material document as well as a lot of further attributes. Material document data will be stored in MATDOC only and not anymore in MKPF and MSEG.
- MATDOC is also a new line item table for inventory management and it eliminates 26+ tables e.g. MSTQH, MSTEH, MSTBH, MSSQH, MSSAH, MSPRH, MSLBH, MSKU, MSKAH, MKOLH, MCHBH, MARDH, MARCH, MSTQ, MSTE, MSTB, MSSQ, MSSA, MSPR, MSLB, MSKU, MSKA, MKOL, MCHB.
- KONV table is Obsolete, replaced with PRCD-ELEMENTS.
