Manage Product Master

Manage Product Master provides the user the option to create, edit, search and display the Products and Single Articles.

Read more in

[App Documentation](#)

The screenshot displays the SAP Product Master Fiori app interface. At the top, the title bar shows 'Product Master' with a search icon. Below the title bar, the product identifier 'SHOCK_END 76' is displayed, along with 'Edit', 'Copy', and 'Share' icons. The main content area is divided into sections: 'Product Group' (Base Unit of Measure: each (EA)), 'Article Category' (Product), and 'GTIN'. Below these, a horizontal menu lists various data areas: BASIC DATA, TEXTS, ATTACHMENTS, PURCHASING, SALES, STORAGE, PLANTS, DISTRIBUTION CHAINS, and VALUATION AREAS. The 'BASIC DATA' section is expanded, showing a grid of product information:

Product Number: SHOCK_END (76)	Base Unit of Measure: each (EA)	Created By: CHITRALA
Product Group:	Division:	Created On: 24.11.2015
Article Category: Product	Batch Management Required: No	Last Changed by: CHITRALA
Product Type: Semifinished Product (HALB)	Marked for Deletion: No	Last Changed On: 08.12.2015
Old Product Number:		

Product List

You can use the **Product List** app to search for and display products in your system based on certain search criteria, such as product, plant, product type, product group, and so on.

Key Features

Search for products in your system

Display the details of a product, such as base unit of measure, valuation class, price control, inventory price, and so on

Navigate to the **Manage Product Master Data** app from the product details page

Export the product list to a spreadsheet file

Manage Supplier Master Data

This app allows the business users to manage Supplier master data.

Read more in

[App Documentation](#)

The screenshot displays the 'New Supplier' app in the SAP Fiori environment. The top navigation bar includes the SAP logo, a 'Supplier' dropdown menu, and a search icon. Below the header, the 'New Supplier' title is shown with a plus icon. The main content area is divided into several tabs: BASIC DATA, ROLES, ADDRESS, BANK ACCOUNTS, TAX NUMBERS, PURCHASING, COMPANY CODES, CONTACTS, and ATTACHMENTS. The 'BASIC DATA' tab is active, showing fields for Grouping, Business Partner Category, Organization (2), Legal Form, and Industry. It also includes Name 1 through Name 4, Liquidation Date, and Natural Person checkboxes. Below this, the 'Additional Information' section is divided into three columns: Finance (Customer, Reference Account Group, Alternative Payee), Overall Blocks (Payment Block, Central Purchasing Block, Central Posting Block), and Organizational Data (International location number 1, International location number 2, VAT Liability). At the bottom, the 'Roles' section is visible, showing a table with columns for Business Partner Role, Valid From, and Valid To. The table currently contains no data, indicated by 'No entries found.' at the bottom. The interface includes standard SAP Fiori controls like 'Delete', '+', and 'Save' buttons.

The following scope items in the [SAP Best Practices Explorer](#) are using this app.

Req. for Quotation

ME41 - Create Req. for Quotation

ME42 - Change Req. for Quotation

ME43 - Display Req. for Quotation

Manage RFQs

You can use this app to create requests for quotations (RFQ) in SAP S/4HANA environment. You send these RFQs later to SAP Ariba Sourcing, where the bidders and suppliers can place the bids. After you have decided which bidder or supplier should receive the award, you send the awarded quotation back to SAP S/4HANA. A purchase order is created automatically in the background. You can display it within the *Manage Purchase Orders* app.

Monitor Purchase Order Items

With this app, you can monitor the status of Purchase Order items based on criteria such as the material, supplier, quantity, value and so on. You can use a filter to display the list of purchase order (PO) items. This list can be modified by changing the filters according to your requirement. This app monitors purchase order items only. By default, the list displays overdue items (Quantity Still to be Delivered and Value Still to be Invoiced) only.

Note: You can access or use this app only if you are a Purchaser.

Monitor Purchase Requisition Items By Account Assignment

With this app, you can display purchase requisition items based on their account assignments. By default, purchase requisition items are grouped based on the cost centers to which they belong.

This app is available for the role Accounts Payable (A/P) Accountant.

Key Features

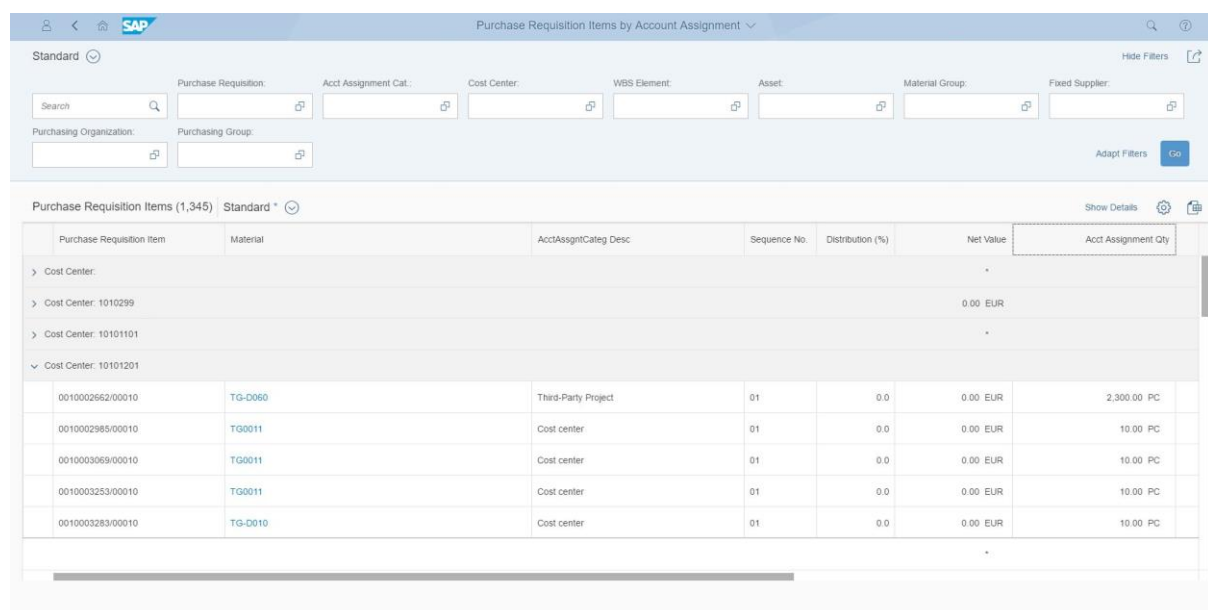

- View purchase requisition items grouped by their cost centers using filter criteria such as purchase requisition, account assignment category, cost center, WBS element, and so on
- Click on a cost center to view details such as material, account assignment category description, sequence number, distribution percentage, and account assignment quantity for each purchase requisition item assigned to that cost center
- Select a purchase requisition item in a cost center and click Show Details to view the source of supply, account assignment, and general information
- Navigate to view contextual information related to a material

Manage Purchase Orders

You can use this app to manage purchase orders to ensure that you get the ordered items on time, at the correct location, and in the required quantity. You can manually order materials for direct consumption as well as services. The list of purchase orders that is displayed is based on the header level of the purchase order (PO), so the information shown relates to the entire PO. On the overview, you can immediately see the number of overdue items for each PO. Depending on the status of the PO, you can still make changes such as adding or deleting items, or changing the purchase order quantity. The item types standard and third party are supported. The product type groups material and service are supported.

Schedule Physical Inventory Document Creation

With this app you can create and schedule a job to create physical inventory documents for your physical inventory process. To automate the physical inventory process, the creation of the physical inventory documents is carried out on a regular basis. Therefore, you can use this app to create a job that performs this creation task for you, thereby reducing your workload by running this task smoothly in the background. During the job run, the system checks (based on the job template

MICKAEL QUESNOT  

settings) which material should be part of the next physical inventory count. Finally, the system compiles a list of the possible materials. Under **Results**, the job list displays all materials that were included in the physical inventory document.

You can define your own job templates or use the two predefined job templates and then adapt them to your needs:

In the predefined job template for **annual physical inventory**, the system plans all materials that have to be counted since the last planning run (for example, no counting has taken place for a year).

In the predefined job template for **cycle counting**, the system plans all materials that have to be counted because a certain counting frequency has been reached again, for example, monthly counting.

The system issues status messages both when the job is created and when the job is executed.

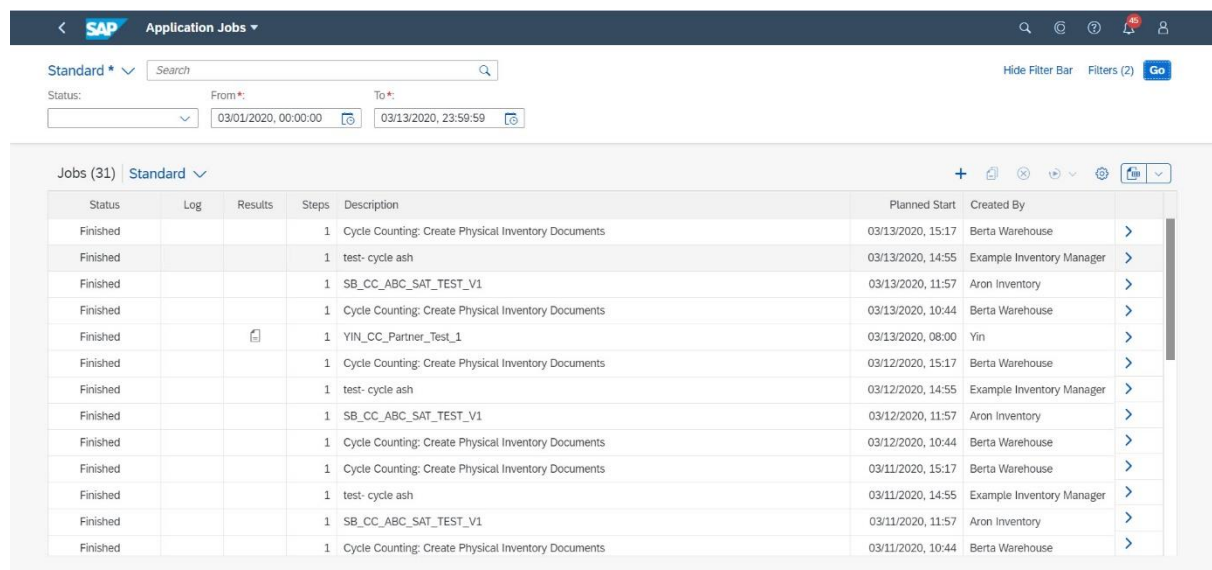

The app supports you, for example, as an inventory manager in the automatic and scheduled creation of physical inventory documents in the background to get the results at the right time when you need them.

[Physical Inventory \(S/4\)](#)

The screenshot shows the SAP Application Jobs interface. At the top, there's a header bar with the SAP logo and 'Application Jobs' dropdown. Below it, a search bar and filter options are visible. The main area displays a table of jobs with columns: Status, Log, Results, Steps, Description, Planned Start, and Created By. The table lists 15 jobs, all with a status of 'Finished'. The descriptions include 'Cycle Counting: Create Physical Inventory Documents' and 'test- cycle ash'. The planned start dates range from 03/11/2020 to 03/13/2020. The created by field lists 'Berta Warehouse', 'Example Inventory Manager', and 'Aron Inventory'.

Status	Log	Results	Steps	Description	Planned Start	Created By
Finished			1	Cycle Counting: Create Physical Inventory Documents	03/13/2020, 15:17	Berta Warehouse
Finished			1	test- cycle ash	03/13/2020, 14:55	Example Inventory Manager
Finished			1	SB_CC_ABC_SAT_TEST_V1	03/13/2020, 11:57	Aron Inventory
Finished			1	Cycle Counting: Create Physical Inventory Documents	03/13/2020, 10:44	Berta Warehouse

Finished			1	Cycle Counting: Create Physical Inventory Documents	03/11/2020, 10:44	Berta Warehouse

Cycle Counting - Classification

With this app you can manage cycle counting classifications for materials in your stock based on the cycle counting settings maintained in the self-service configuration UI (SSC UI) **Cycle Counting**. It is also possible to remove an existing cycle counting classification, if you don't want the material to be part of the cycle counting method anymore.

MICKAEL QUESNOT  

Directeur BU SAP SCM & CONCUR

These classifications are the basis for an optimized preparation for your physical inventory process at plant level. In general, you can define these settings once, or maintain changes whenever necessary.

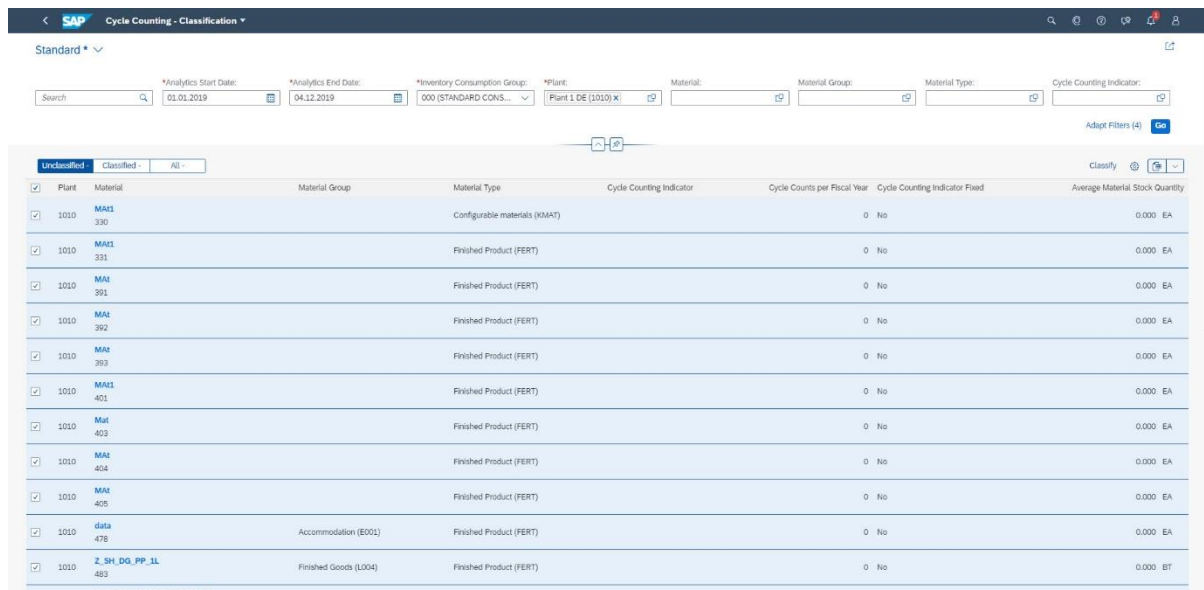

This app supports you, for example, as an inventory manager.

[Physical Inventory \(S/4\)](#)

The screenshot shows the SAP Cycle Counting - Classification app interface. At the top, there are filters for Analytics Start Date (01.01.2019), Analytics End Date (04.12.2019), Inventory Consumption Group (000 STANDARD CONS...), Plant (Plant 1 DE (1010) X), Material, Material Group, Material Type, and Cycle Counting Indicator. Below the filters, there is a table with columns: Plant, Material, Material Group, Material Type, Cycle Counting Indicator, Cycle Counts per Fiscal Year, Cycle Counting Indicator Fixed, and Average Material Stock Quantity. The table lists various materials, including MA1 330, MA1 331, MA1 391, MA1 392, MA1 393, MA1 401, MA1 403, MA1 404, MA1 405, data 478, and Z_SH_DG_PP_1L 483. Each row has a checkbox in the Plant column and a dropdown menu in the Cycle Counting Indicator column.

Plant	Material	Material Group	Material Type	Cycle Counting Indicator	Cycle Counts per Fiscal Year	Cycle Counting Indicator Fixed	Average Material Stock Quantity
1010	MA1 330		Configurable materials (KMA1)	0	No	0.000	EA
1010	MA1 331		Finished Product (FERT)	0	No	0.000	EA
1010	MA1 391		Finished Product (FERT)	0	No	0.000	EA
1010	MA1 392		Finished Product (FERT)	0	No	0.000	EA
1010	MA1 393		Finished Product (FERT)	0	No	0.000	EA
1010	MA1 401		Finished Product (FERT)	0	No	0.000	EA
1010	MA1 403		Finished Product (FERT)	0	No	0.000	EA
1010	MA1 404		Finished Product (FERT)	0	No	0.000	EA
1010	MA1 405		Finished Product (FERT)	0	No	0.000	EA
1010	data 478	Accommodation (E001)	Finished Product (FERT)	0	No	0.000	EA
1010	Z_SH_DG_PP_1L 483	Finished Goods (L004)	Finished Product (FERT)	0	No	0.000	BT

The screenshot shows the same SAP Cycle Counting - Classification app interface, but with a 'Classify' dialog box open for material MA1 330. The dialog box has two sections: 'Cycle Counting Indicator' and 'Cycle Counting Indicator Fixed'. The 'Cycle Counting Indicator' section has a dropdown menu with '< Replace Field Values >' selected, and a text input field with 'A'. The 'Cycle Counting Indicator Fixed' section has a dropdown menu with '< Keep Existing Choices >' selected, and a text input field with 'Yes'. The background table is dimmed.

Plant	Material	Material Group	Material Type	Cycle Counting Indicator	Cycle Counts per Fiscal Year	Cycle Counting Indicator Fixed	Average Material Stock Quantity
1010	MA1 330		Configurable materials (KMA1)	0	No	0.000	EA
1010	MA1 331		Finished Product (FERT)	0	No	0.000	EA
1010	MA1 391		Finished Product (FERT)	0	No	0.000	EA
1010	MA1 392		Finished Product (FERT)	0	No	0.000	EA
1010	MA1 393		Finished Product (FERT)	0	No	0.000	EA
1010	MA1 401		Finished Product (FERT)	0	No	0.000	EA
1010	MA1 403		Finished Product (FERT)	0	No	0.000	EA
1010	MA1 404		Finished Product (FERT)	0	No	0.000	EA
1010	MA1 405		Finished Product (FERT)	0	No	0.000	EA
1010	data 478	Accommodation (E001)	Finished Product (FERT)	0	No	0.000	EA

Stock - Multiple Materials

You can use this app to get an overview of your material stocks. You can review your stock by the plants and storage locations for which you are responsible. The app can display the stock information as a table or a diagram.

For example as an inventory manager, you can perform the following tasks:

Display a stock overview of one or multiple materials.

Display the value of your stocks.

Export the stock information to a spreadsheet file.

Send a link to the stock overview of the selected material via e-mail.

Use SAP Jam to share your comments on the selected material.

[Invoice Processing \(S/4\)](#)

The screenshot shows the SAP Supplier Invoices List app interface. At the top, there's a header bar with the SAP logo and the title 'Supplier Invoices List'. Below the header, there's a search bar and several filter fields: 'Invoice Document No.', 'Invoicing Party', 'Status', 'Company Code', 'Posting Date', 'Invoice Date', and 'Reference'. The 'Posting Date' and 'Invoice Date' fields have date pickers. Below the filters, there's a table titled 'Invoices (2)' with columns: 'Invoice Number', 'Invoicing Party', 'Status', 'Company Code', 'Gross Invoice Amount', 'Posting Date', 'Invoice Date', and 'Reference'. The table contains two rows of data. The first row has invoice number 5105603573/2018, invoicing party 123 (1000280), status Posted, company code 0001, gross invoice amount 121,00 EUR, posting date 06.07.2018, and invoice date 06.07.2018. The second row has invoice number 5105603565/2018, invoicing party Karu Vendor Ltd. (1000141), status Posted, company code 0001, gross invoice amount 400,00 EUR, posting date 06.07.2018, and invoice date 06.07.2018. Below the table, there's a 'Delete' button and a settings icon.

Invoice Number	Invoicing Party	Status	Company Code	Gross Invoice Amount	Posting Date	Invoice Date	Reference
5105603573/2018	123 (1000280)	Posted	0001	121,00 EUR	06.07.2018	06.07.2018	>
5105603565/2018	Karu Vendor Ltd. (1000141)	Posted	0001	400,00 EUR	06.07.2018	06.07.2018	>

Manage Supplier Invoices

With this app you can create and display a supplier invoice based on the received document. You can specify the purchase order items to which your supplier invoice relates. If you select the Simulate or Post function, the system compares the quantity and amount data of each supplier invoice item with the data of the related purchase order item. If goods-receipt-based invoice verification has been defined for a purchase order item, the system compares the supplier invoice data with the related goods receipt data. If the deviation is outside defined tolerances, the invoice is posted, but the
