

SAP S4HANA MM

Material Master:

1. Material Master: Material master is a storage of information about the materials in that company.

Material type: It is a group of material having similar attributes.

Material group: It is a group of material having similar properties.

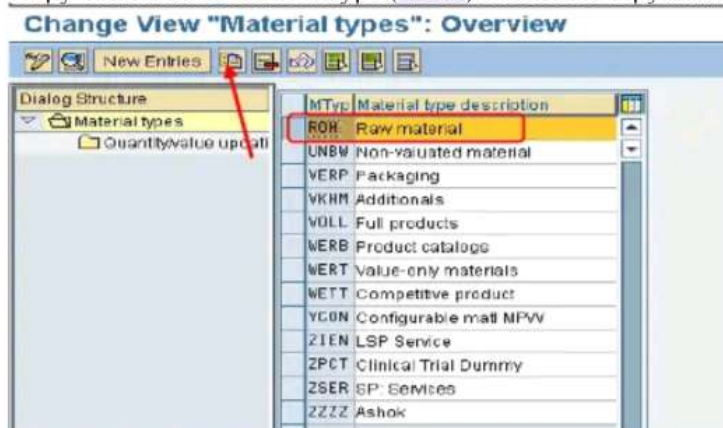

Configuration of Material type and Material group:

Creating Material Type:

IMG menu	Spro→IMG→Logistics general →material master → Basic settings →Material types
----------	---

Copy the standard material type (**ROH**) and select copy as...

Change View "Material types": Details

Material Type ZASH Ashok industries raw mat

General data

Field reference R0H X-plant matl status ☐
 SRet: material type R0H Item category group ☐
 Authorization group ☐ ☒ External no. assignment w/o check ☐ Initial Status

Special material types

☐ Material is configurable
☐ Material f. process
☐ Pipeline mandatory
☐ Manufacturer part

Price control S Standard price
 Acct cat. reference 8961 ☐ Price ctrl mandatory

Quantit/value updating

Quantity updating
☐ In all valuation areas
☐ In no valuation area
☒ By valuation area

Value updating
☐ In all valuation areas
☐ In no valuation area
☒ By valuation area

Retail-specific fields

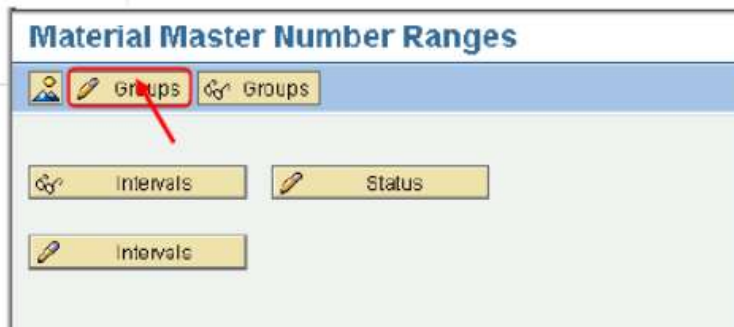

Material type ID General material type

We can change the material type as per the requirement and select the check box if number range required as external, once save then our material type will create.

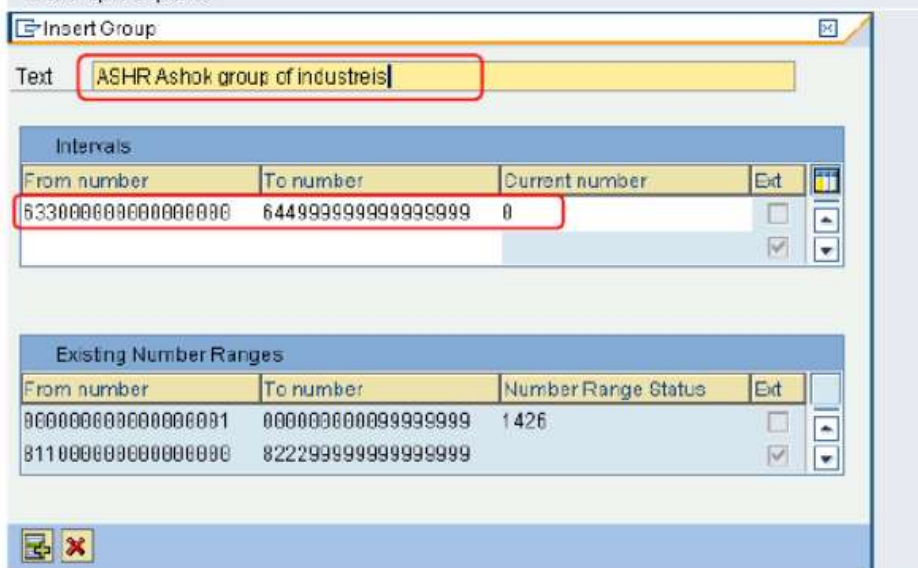

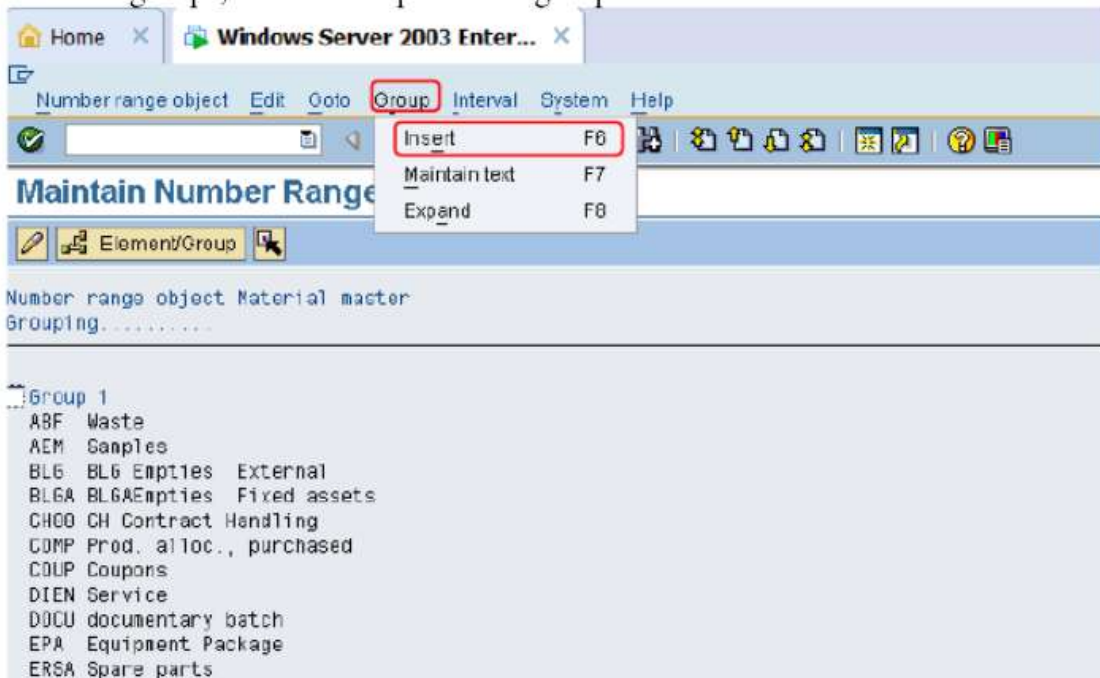

Logistics - General

Material Master

Configuring the Material Master
 Field Selection
 Basic Settings
 Define Output Format of Material Numbers
 Make Global Settings
 Maintain Company Codes for Materials Management
Material Types
 Define Attributes of Material Types
 Assign Material Types to Special "Create" Transactions
Define Number Ranges for Each Material Type
 Define Attributes of System Messages

Click on groups, and at the top click on group and select as insert.

Now material group and number ranges has been created.

Now assign material type to material group.

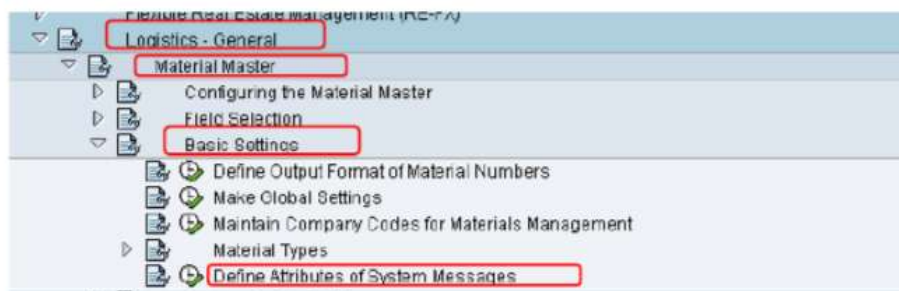

Double click on material type (ZASH) and select the check box for material group (ASHR) and at the top click on element group.

☒ ASHR Ashok group of industries
ZASH Ashok industries raw mat

Now Material type is assigned to material group.

Define Attributes of system messages:

In this configuration we can change the messages types like error msg to warning msg.

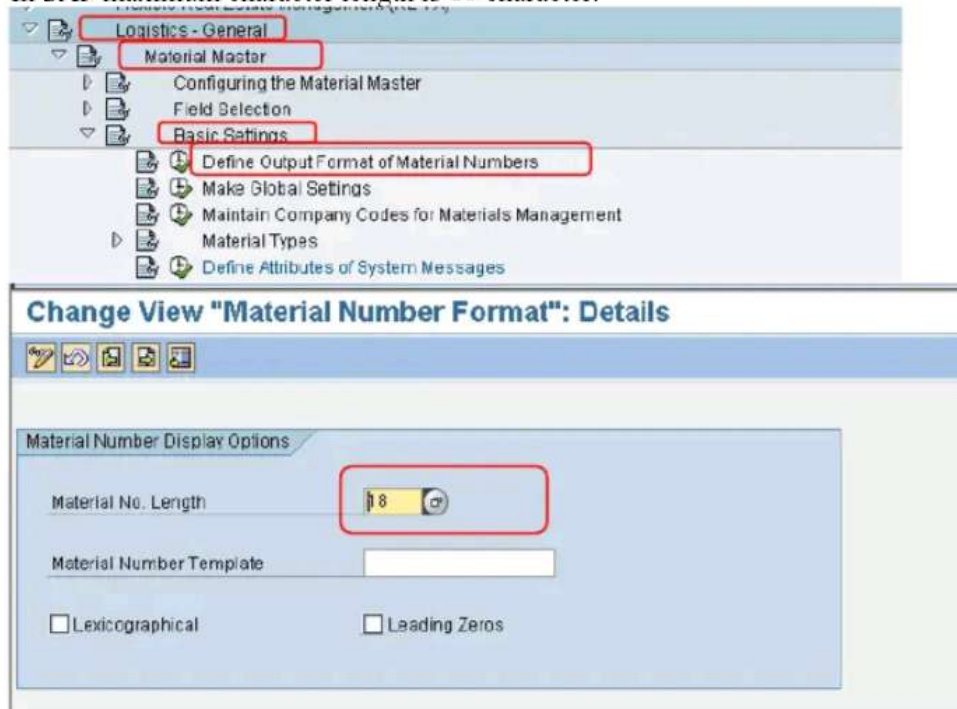

Below is the screen we can change the message types.
Based on the message number we can identify the changes.

Change View "System Messages": Overview					
Version	Appl A	No	Message text	Cat	
00	M3	148	Price unit not allowed since valuation price would be zero	W	
00	M3	159	Validity date is in the past	W	
00	M3	347	EAN already used for unit of measure & of this material	W	
00	M3	348	The EAN & is already used for the material &		
00	M3	767	Important: the date of production must be entered in the goods receipt	W	
00	M3	818	You have not yet entered an EAN for the material &		
00	MH	009	You have not yet maintained the & view	W	
00	MH	263	Consignment control and supply source do not agree	W	
00	MH	264	The total fiber content does not equal 100%	W	
00	MN	189	The external material group & does not exist	W	
00	MN	221	Maintain the planning calendar for the plant or for its reference plant	W	
00	MN	312	The basic material & does not exist		
00	MN	326	There are still open purchase order items or scheduling agreements	W	
00	MN	327	There are still production orders for the material	E	
00	MN	332	Enter the purchasing group for the MRP procedure		
00	MN	333	Maintain accounting data for optimum lot sizing		

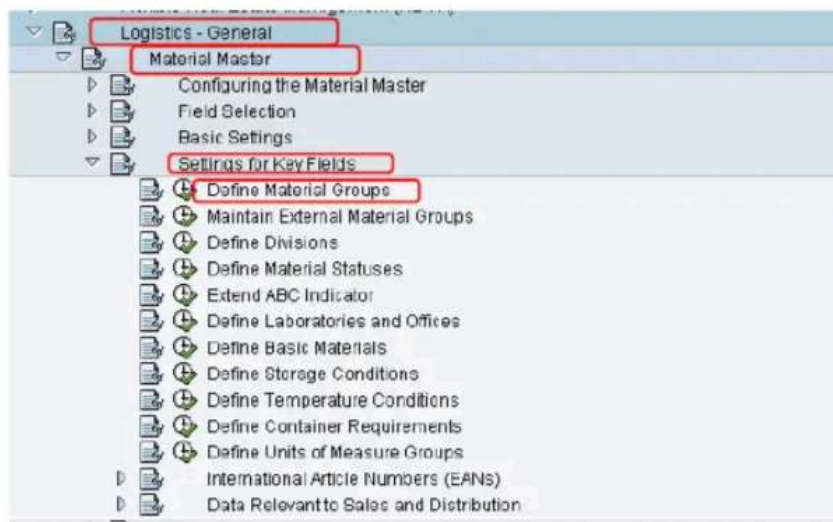

Define output format of material numbers:

Here we can increase or decrease the material character length.
In SAP maximum character length is **18** character.

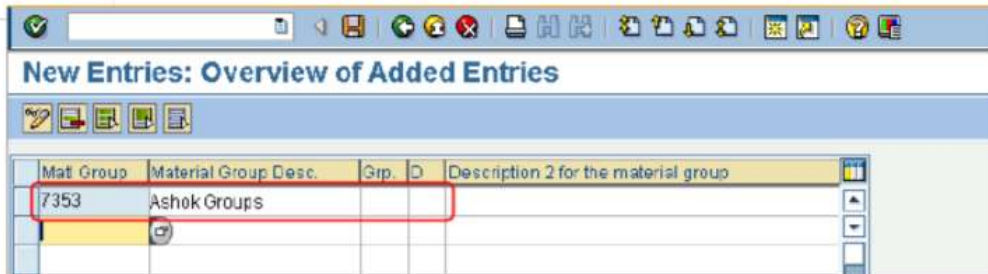

Here we can also change like (TEMPLATE) as material number.

Creating material group:

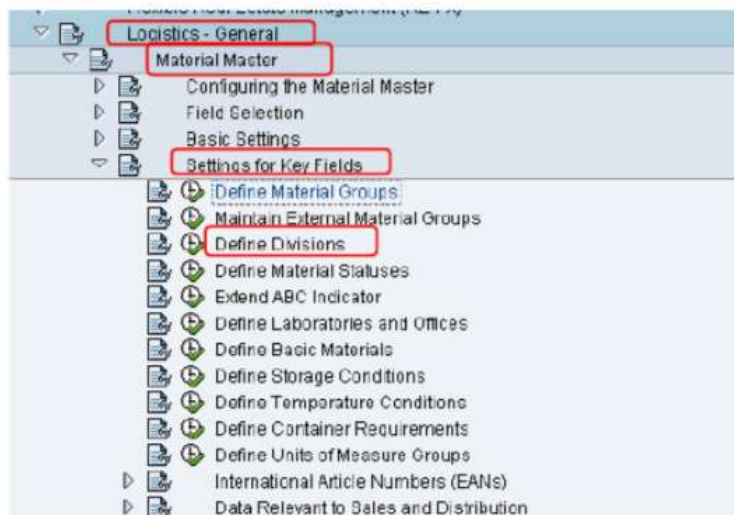

Click on material group and select the new entries, name the group then save it.

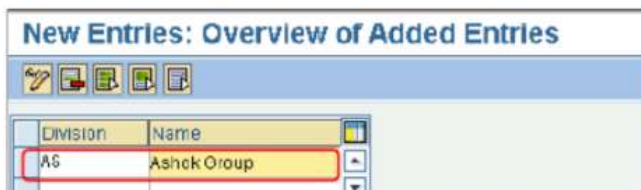

Mat. Group	Material Group Desc.	Grp. ID	Description 2 for the material group
7353	Ashok Groups		

Creating Division:

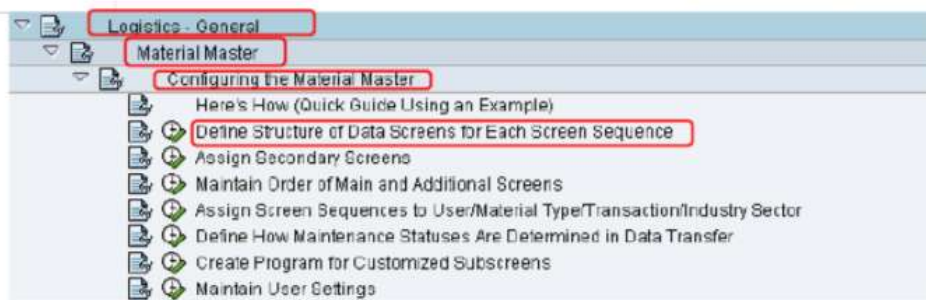

Click on division and select new entries and fill the required division and save it.

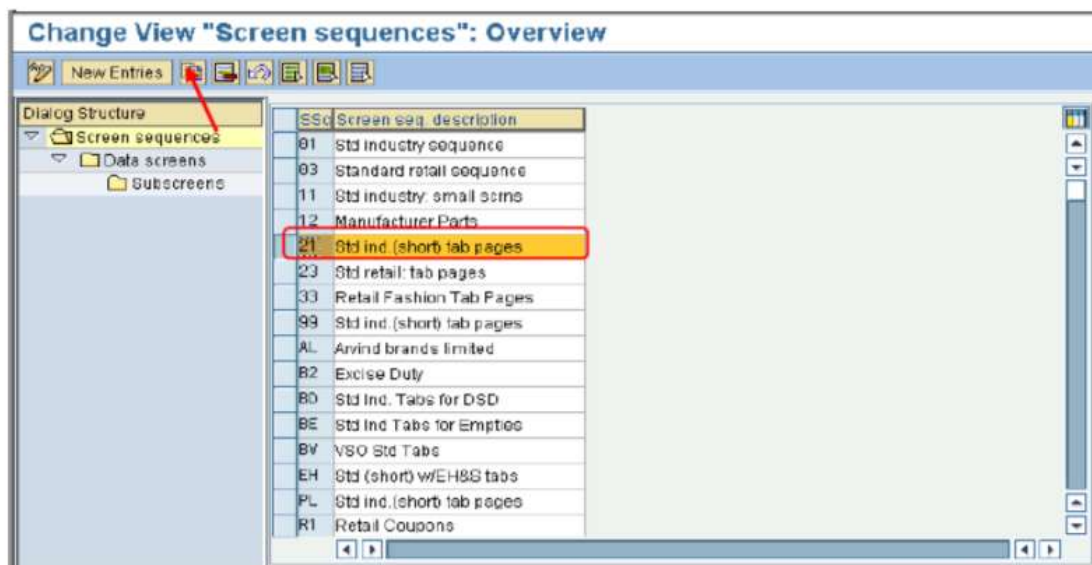

Division	Name
AS	Ashok Group

In this node only we can create the laboratories, storage conditions, temperature conditions.

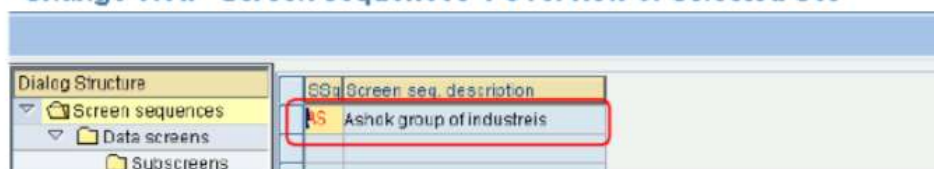

Define structure of data screens for each screen sequence:

Select standard screen sequence (21) and click on copy as.

Change View "Screen sequences": Overview of Selected Set

Here we can change the screen sequences.

Select the screen sequence and click on data screens.

Creating Industry sector:

New Entries: Overview of Added Entries

Industry sector	Industry description	Field reference
S	Ashok group of industries	M

Configuration of material master testing:

Here what and all the configurations done, you check the creation of material by using MM01 T code.

The screenshot shows the 'Create Material (Initial Screen)' with the following fields:

- Material: [Empty]
- Industry sector: S Ashok group of ind
- Material Type: ZASH Ashok industri
- Change Number: [Empty]
- Copy from...: [Empty]

Industry sector and material type is configured.

The screenshot shows the 'Create Material (Initial Screen)' with the 'Organizational Levels' dialog box open. The dialog box has the following fields:

- Plant: 122
- Storage Location: 0001
- MRP profile: [Empty]
- Org. levels/profiles only on request: [Checked]

Plant and storage location is configured.
